Ask BPL Pilot - Completion Summary

VizionScop3 LLC | Brooklyn Public Library | 2026-05-16

Internal AI policy Q&A pilot (PRD v3 / TRD). Monorepo: FastAPI orchestrator + Vite/React web demo. Closed-corpus RAG (Pinecone + Postgres), JWT tester auth, build-team admin APIs, scripted demo acceptance.

Backend (packages/orchestrator)

- FastAPI: /healthz, /readyz (Postgres SELECT 1), X-Request-ID on all responses
- POST /a
- React Router SPA: /login, host (/ and /staff/policies), /internal/console/* panels
- In-mem
- GitHub Actions CI: Python 3.11 (ruff, migrate, seed, pytest) + Node 22 (lint, build)
- Docker
- Console UI is panel stubs / JSON readout vs wireframe stat grid and document table
- Ingest a

Repo: AskBPL on main - commits: initial import -> orchestrator RAG/Pinecone -> AskPilot shell/avatar -> layout polish + routing refactor (in progress)
